TITLE OF THE PAPER

FIRST NAME LAST NAME ¹, FIRST NAME LAST NAME ², FIRST NAME LAST NAME ²*

¹ Full Affiliation, Address; E-Mails: author1@email
² Full Affiliation, Address; E-Mails: author2@email; author3@email

ABSTRACT:
Abstract (not longer than 250 words) should explain the aim of the paper and include the most relevant results and conclusions

Keywords: Key words should list the main topic of the paper and should not contain more than 6 words or phrases, which should be separated by commas.

INTRODUCTION

It is particularly important that the introductory part be as brief as possible and clear in description of the aims of investigation. Previous relevant work regarding the topic of the manuscript should be included with references.

MATERIALS AND METHODS

Experimental part should be written clearly and in sufficient detail to allow the work to be repeated. Detailed description is required only for new techniques and procedures, while the known methods must be cited in the references. For chemicals and apparatus used full data should be given including the name, company/manufacturer and country of origin. Statistical analysis should also be included. All unnecessary details should be omitted from the experimental part. Spectra, chromatograms and similar will not be published if their only purpose is to additionally characterize particular compounds.

RESULTS AND DISCUSSION

Results and Discussion can be written as two separate or one combined section. Discussion should not be merely the repetition of the obtained results. Combining the results with discussion can simplify the presentation.

*Author to whom correspondence should be addressed; E-Mail: author@email; Tel.: +x xxx xxx xxx;
Each table and illustration must have all necessary information to be understood independently of the text. The same data should not be reproduced in both diagrams and tables. Whenever possible, formulae and equations are to be written in one line.

All figures (graphs, photographs, diagrams, etc.) and tables should be cited in the text and numbered consecutively throughout. Preferred program for writing figures and tables is Excel. The placement of figures and tables should be indicated. The size of letters and other symbols on diagrams and figures should be such as to allow reduction to column width without loss in legibility. Several figures should be grouped in a plate on one page. Unmounted figures are preferred. Figures and other illustrations should be of good quality, well-contrasted and black and white.

Figure legends should be placed at the bottom of each figure, while table headings should appear above the tables. The values on the x- and y-axes must be clearly and precisely defined, decimal numbers must have decimal points, not commas. Footnotes to tables should be indicated by superscript letters or symbols. Experimental error and statistical significance should be stated clearly.

Figures must be numbered using Arabic numbers - italic, centered. Figure caption and source under the figure.
Tables must be numbered using Arabic numerals - italic, centered, above the table.

CONCLUSIONS

It should indicate the significant contribution of the manuscript with its applications.

ACKNOWLEDGEMENTS

Acknowledgements to colleagues or institutions or companies for donations or any other assistance are recommended to be put at the end of the manuscript, before references, rather than in the text.

CONFLICT OF INTEREST

State any potential conflicts of interest here or "The authors declare no conflict of interest".

REFERENCES
The list of references should be arranged alphabetically by authors’ names and should be as full as possible, listing all authors, the full title of articles and journals, publisher and year.

References should be given in the following form:

**References to a journal publication:**

**References to a conference:**

References to a book:

References to a chapter in an edited book:

References to a internet:

Citing and listing of web references. As a minimum, the full URL should be given. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.(example: Abbott, A., Basurto, M., Daley, C.A., Nader, G. and Larsen, S. (2004). Enhanced nutrient content of grass-fed beef: justification for health benefit label claim. Available at: http://www.csuchico.edu/agr/grassfedbeef/health-benefits/index.html [Accessed: 11 July, 2007].

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly “Articles in Press” because they have not yet received their full bibliographic information. The correct format for citing a DOI is shown as follows (example taken from a document in the journal Physics Letters B: doi:10.1016/jphysletb.2003.10.071

When you use the DOI to create URL hyperlinks to documents on the web, they are guaranteed never to change.

IN-TEXT CITATION

In-text citations are citations within the main body of the text and refer to a direct quote or paraphrase. They correspond to a reference in the main reference list. These citations include the surname of the author and date of publication only. Using an example author Philip Arrena, this takes the form:

the surname of the author and date of publication only. Using an example author Philip Arrena, this takes the form:

Two Authors:

*The surname of both authors is stated with either ‘and’ or an ampersand between. For example:*

Three, Four or Five Authors:

*For the first cite, all names should be listed:*

*Further cites can be shorted to the first author’s name followed by et al:*

Six or More Authors:

*Only the first author’s surname should be stated followed by et al, see the above example.*

No Authors:

*If the author is unknown, the first few words of the reference should be used. This is usually the title of the source.*

*If this is the title of a book, periodical, brochure or report, is should be italicised. For example:*

(A guide to citation, 2017).

*If this is the title of an article, chapter or web page, it should be in quotation marks. For example:*

(“APA Citation”, 2017).

Citing Authors With Multiple Works From One Year:

*Works should be cited with a, b, c etc following the date. These letters are assigned within the reference list, which is sorted alphabetically by the surname of the first author. For example:*

(Muller, 2017a) Or (Muller, 2017b).
Citing Multiple Works in One Parentheses:

If these works are by the same author, the surname is stated once followed by the dates in order chronologically. For instance:

If these works are by multiple authors then the references are ordered alphabetically by the first author separated by a semicolon as follows:

(Brunner & Schmit 2017; Thomas, Coyne, & Davis, 2015).

Citing a Group or Organisation:

For the first cite, the full name of the group must be used. Subsequently this can be shortened. For example:

First cite: (International Citation Association, 2015)

Further Cites: (Citation Association, 2015)

Citing a Secondary Source:

In this situation the original author and date should be stated first followed by ‘as cited in’ followed by the author and date of the secondary source. For example:

The manuscript should be carefully checked to ensure that the spelling of authors’ names and dates are exactly the same in the text as in the reference list.
